

MMS CAMERA

GSM ALARM CAMERA FOR AREA MONITORING

GSM camera supports GSM network, transmits data through SMS and GPRS. It supports motion detection and can detect and alarm any movement within monitoring area. It can connect up to 15 pcs sensors; you can monitor several areas at the same time, excellent performance and reliance. The back-up lithium battery ensures constantly operation during external power failure.

Features:

- Work with GSM SIM card
- Global suitable
- DIY installation
- Remote control by cell phone or management system
- Receive the SMS & images alarm by cell phone, E-mail or management system
- IR LEDs, professional cameras, 24 hours monitoring, or timing monitoring
- Trait Infrared body detector
- Enlarged shooting angel
- Farther shooting distance
- Farther effective distance of the Infrared body sensor.

Motion Detection: Detect any motion within the monitoring area and send alarm. **External Connection:** Connect wireless sensors (Max. 15), such as door magnet, PIR sensor, smoke sensor, gas sensor etc. The camera can report alarm from all connected sensors.

Infrared Light: The build-in IR light enables the camera to capture images in dark environment.

Resolution: 300.000 pixel CMOS camera.

Watch images directly on your mobile phone: The camera sends MMS images to your mobile phone for you to watch anywhere, anytime.

Receive images by email: The camera can send MMS images to any preset email.

Monitoring Methods: Choose between manually or scheduled monitoring.

Remote Control: Include 2 remote controls for manual operation on/off and panic button.

New functionality can be developed according to customers requirements.

Technical data

- Power adapter input 100V-240V/50Hz
- output DC 5V
- Work temperature -10 - +45 degree °C
- Work frequency EGSM900, GSM1800 (Optional GSM850, PCS1900)
- Lithium - ion battery 800mAh
- Standby time of the battery (Depending on network) 24 hours
