

GSM KEY

PRO VERSION

OPENING GATES, DOORS AND BARRIERS BY A MOBILE PHONE FOR HOTELS, GARAGES, PENSIONS, PARKING PLACES

GSM Key is an application to actuate electric drive of gate openers, doors and barriers via a mobile phone. The opening and closing operations are FREE of charge as they are reduced to mere ringing signals (i.e. ringing the address and hanging up) to the phone number of SIM card installed in the actuating device.

The device interface is formed by two output ports equipped with relays and four optically isolated input ports. Authorization of the competent user is done automatically by call list in the GSM Key.

DESCRIPTION:

- Suitable for medium – sized companies, office buildings, hotels and lodging houses with frequent traffic (more than 20 users)
- User administration through a mobile phone GSM Key ADMIN software
- GSM Key ADMIN software – a professional solution for configuring an unlimited number of GSM Keys PRO by a computer
- Checking the open/closed state of entrance through SMS message
- Sending SMS message informing about power failure when using a backup battery

PACKAGE CONTENTS:

- GSM Key 2 PRO 2
- Power Supply 12 V DC/1250 mA
- GSM Whip Aerial, 3 dB
- CD (GSM Key ADMIN, Manual)
- Quick manual

Technical parameters

GSM module: Cinterion Wireless Module TC65i

Frequency: Quad – Band 850/900/1800/1900 MHz

User Interfaces:

- 2 x relay outputs (for parallel connection of engine control)
- 2 x optically isolated inputs (additional functions)
- RS232 – RJ45 connector

Ambient temperature: -20°C + 50°C

Auto switch – off at: -40°C + 85°C

Supply voltage range: 11-15 V, 22-30 V

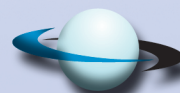

Powerconsumption: 1 W / 3,5 W (reception / transmission)

Antenna connector: FME (50 l)

Dimensions: 30 x 90 x 102 mm

Fastening: 35 mm DIN lath

Weight: 150 g
